

# ONLINE FOOD NGO

FOOD FOR EVERYONE

## PROBLEM WE HAVE SOLVED

We all know that currently our country is facing a pandemic of COVID-19. And due to this our honorable PM Narendra Modi announces 21 days lockdown. Due to this lockdown there are lot of daily wages workers who are currently not earning anything. And they are not getting proper food. As some NGO's are working well for the supply of food. But we need a solution that is able to make a smooth delivery of food to these workers. A solution which can help to provide food to more daily wages workers. Actually the main problem is that whenever any NGO or government organization is delivering food then the most needy people are left behind. So we need a solution which will deliver the food to every needy one.

## OUR IDEA

Currently, during this pandemic many people in the country wants to help our nation. They wants to serve themselves in any way but we don't want anyone to come out. Our idea is to develop a online web portal where anyone can register where he/she will be asked few questions like their name, email, phone number, how many lunch boxes they can provide (minimum one lunchbox) per day? and for how many days they can provide? Accordingly government emergency vehicles will collect all the lunchboxes from specific city or area and donate it to the most needy one.

## BENEFITS

- Currently NGO's are working and there are more chances of spreading of COVID-19 in this situation. But using our idea we can stop this.
- Help to break the spread chain of COVID-19.
- The most needy peoples can get food.
- If a temple is providing food, if a gurudwara is providing food or if a mosque is providing food then their volunteers need not to come out to distribute food government emergency vehicles will collect them.

## TECHNOLOGIES USED

To develop this web portal we will use following technologies,

- Python
- Django
- Cloud Computing

And we need a cloud space for deploying this application and a domain name.

# THANK YOU

WANTS TO HELP OUR NATION IN  
THIS PANDEMIC
